

Dear Cari,

Following up on our discussions, I'm excited to present this proposal that outlines how Luci Digital (Daryl and Lucia) will support WestWorld through advanced technical services, ongoing maintenance, and structured retainer management. This partnership framework includes service rates, scheduling, and the value we'll bring to both WestWorld and iWorld Connect, with a particular focus on cost savings and profitability.

1. Overview of Services and Commitment

Luci Digital is committed to providing WestWorld with continuous support, infrastructure upgrades, and brand alignment across WestWorld and iWorld Connect. By streamlining operations, enhancing security, and reducing overhead, we'll help position WestWorld for both immediate savings and future growth.

2. Minimum Weekly Hours Commitment

- **WestWorld Internal Services:**

- A minimum of **15 hours per week** dedicated to in-store work, including sales support, operational tasks, and management.
- **Rate:** \$40/hour.

- **Luci Digital Services (Redeemed Hours):**

- A minimum of **10 hours per week** for Luci Digital services, covering IT support, marketing, business strategy, and specialized project work.
- **Rate:** Starting at **\$60/hour** for basic services, with higher rates for specialized work.
- **Additional Project Hours:** If a project exceeds 10 hours in each week, the additional hours will be billed separately. If you'd prefer to set a weekly cap, please let us know.

3. Service Rates and Retainer

- **\$5,000 Retainer with Bonus:**

To commence our services, WestWorld will provide a **\$5,000+GST retainer**. If the retainer is paid by **end of day Monday, October 27th**, WestWorld will receive a **40% bonus** for a total of **\$7,000 in service credits**. This credit can be redeemed at the following rates:

Service Type	Standard Rate	Discounted Rate (WestWorld)	Client	WestWorld
IT Support & Technical Services			\$100/hour	\$60/hour
Marketing & Social Media Strategy			\$125/hour	\$80/hour
Website Development & Branding Overhaul			\$150/hour	\$100/hour
Consulting & Business Development			\$150/hour	\$100/hour
Specialized Project Work			\$175/hour	\$120/hour

Specialized Project Work \$175/hour \$120/hour

Top-ups are available at a minimum of \$1,000 for WestWorld and \$150 for WestWorld clients.

4. Scheduling Portal and Policies

The Luci Digital scheduling portal will allow WestWorld to easily manage bookings, set task priorities, and allocate hours for both in-store work and specialized services.

- **Streamlined Task Prioritization:** To help ensure your specific goals are met, our scheduling system will allow you to prioritize tasks within the booked hours. This flexibility means we can tailor daily activities to WestWorld's immediate needs, improving both productivity and cost-effectiveness.

Scheduling Hours and After-Hours Rates:

- **Standard Hours:**

9:30 a.m. to 9:00 p.m., Monday through Saturday.

- **After-Hours Uplift Rates:**

- **After 5:00 p.m. to 7:00 p.m.:** 1.25x the standard rate
- **After 7:00 p.m. to 9:00 p.m.:** 1.5x the standard rate
- **Emergency response after 9:00 p.m.:** 2x the standard rate

By incorporating uplift rates for after-hours services, Luci Digital enables WestWorld to meet urgent client needs, especially during peak seasons, without impacting standard operations. This flexibility supports efficient client service and added revenue opportunities.

5. Retainer Deduction System for Ongoing Maintenance

The \$5,000 retainer will function as a **client maintenance file**, ensuring that essential services like **network monitoring** and **device upkeep** are automatically deducted. This proactive approach minimizes unexpected expenses while keeping operations smooth.

6. Website Branding for WestWorld and iWorld Connect

We will align **WestWorld.ca** as a **retail-focused** site and **iWorldConnect.com** as a **business-to-business platform**. Moving off platforms like Shopify will reduce costs and improve scalability.

7. Evergreen Strategy, Trade-In, and Service Credits Program

To keep WestWorld's equipment up to date and provide added value to customers, Luci Digital will support an **Evergreen Trade-In and Service Credits Program** managed collaboratively by WestWorld and Luci Digital. Here's how it will work:

- **Device Refurbishment and Valuation by WestWorld:**

WestWorld will handle the refurbishment and valuation of trade-in equipment. Devices that are in **full working condition** can be accepted for trade-in, with WestWorld assigning a fair value based on the device's age, condition, and functionality.

- **Service Credits with Luci Digital:**

Customers will receive **service credits** from WestWorld that are redeemable with Luci Digital. These credits can be applied toward technical support, consulting, or other services, providing flexible value for clients' technology needs. Currently, credits are issued as fiat currency, with plans to **tokenize credits** in the future for enhanced tracking and redemption options.

How It Works:

1. **Trade-In:** Customers bring in their device to WestWorld, which assesses it and provides a trade-in value in the form of **service credits**.
2. **Redeem with Luci Digital:** These service credits can be used directly with Luci Digital for expert tech support, consulting, or specialized services, offering customers added value without needing cash for tech services.
3. **Future-Ready Credit System:** For now, credits are easy to use and straightforward, with plans for a tokenized credit system in the future to offer additional flexibility.

- **Resale and Marketing of Equipment:**

Once equipment is traded in and evaluated, Luci Digital will handle **listing and marketing** of these devices across various **marketplaces and channels**, ensuring maximum visibility and resale value. This approach not only frees up WestWorld from managing resale logistics but also opens up pathways for Luci Digital to explore additional distribution channels as the program grows.

- **Expanded Repair Options:**

While Luci Digital is not an Apple-authorized service center, we offer **additional repair strategies** outside of the Apple-authorized repair model that WestWorld maintains. This approach will allow us to provide customers with a broader range of repair options, especially for out-of-warranty services, while supporting WestWorld's existing Apple-authorized commitments.

8. Enhanced Efficiency and Profitability Focus

Beyond immediate service offerings, Luci Digital's partnership with WestWorld will drive cost savings and increased profitability by:

- Streamlining task management and reducing downtime through a structured scheduling and prioritization system.

- Expanding client outreach and digital presence via optimized brand alignment for both WestWorld and iWorld Connect.
- Proactively maintaining equipment through the Evergreen Program, reducing overall expenses associated with outdated technology.

9. IT Procurement and Equipment Sourcing

As part of Luci Digital's services, we also offer **IT procurement** to help businesses like WestWorld find the right equipment at competitive prices. We can assist with sourcing both **new** and **pre-owned/refurbished** equipment, depending on your budget and project needs.

- **Pre-Owned or Refurbished Equipment Sourcing:**

If WestWorld prefers to reduce costs by opting for pre-owned or refurbished equipment, Luci Digital will source and vet the equipment for quality. We charge a **markup** of **\$50** or **15% of the purchase price**, whichever is greater, to cover the time and effort involved in the procurement process.

- **Project-Based Planning:**

If WestWorld has a specific project in mind, such as an office-wide tech refresh or infrastructure upgrade, we can provide **equipment recommendations** and manage the sourcing, ensuring you receive the best value for your budget.

10. Partnership Strategy and Client Care

Luci Digital will operate as an **integrated partner** with WestWorld, providing technical services directly to clients while maintaining a strong link to WestWorld's brand and accountability.

- **Direct Client Service and Accountability:**

While Luci Digital will handle the delivery of services, **WestWorld remains the primary point of contact** for clients, offering them continuity and familiarity. If a client has any feedback or concerns about Luci Digital's services, they are encouraged to reach out to WestWorld, who will facilitate any necessary follow-up with Luci Digital. This ensures accountability and quality control, all while minimizing the amount of client management WestWorld has to take on.

- **Enhanced Client Care with Reduced Overhead:**

By offloading direct technical services and client support to Luci Digital, WestWorld can offer a wider range of services without increasing internal overhead. Luci Digital will manage all aspects of service delivery, troubleshooting, and client satisfaction, helping WestWorld maintain strong customer relationships without stretching its in-house resources.

- **Brand Cohesion and Professionalism:**

Luci Digital's role as a visible partner maintains transparency with clients, reinforcing both WestWorld's and Luci Digital's commitment to quality and care. Our client interactions and marketing will be crafted to align with WestWorld's brand values, ensuring a seamless experience.

11. Industry-Leading Standards and Liability Coverage

As part of Luci Digital's commitment to excellence, we bring the full infrastructure required to maintain **Apple Consultants Network (ACN) status** and other critical certifications. This status is not only a testament to our expertise but a substantial investment in resources, liability coverage, and ongoing certifications that are mandatory to deliver secure and reliable services:

- **Apple Consultants Network (ACN) Membership:**

Membership in ACN is a rigorous commitment, both financially and professionally, costing over \$1,200 annually in membership fees alone. This ensures we meet Apple's standards and remain an authorized point of support within Apple's ecosystem.

- **Errors and Omissions Insurance:**

Luci Digital holds specialized **Errors and Omissions (E&O) insurance** valued at \$3,000 annually, providing WestWorld with added protection and peace of mind. This insurance ensures that if any data loss or critical issue arises, liability coverage is in place, protecting WestWorld from potential financial risk.

- **Exclusive Certifications and Expertise:**

The certifications required to operate within the Apple ecosystem are extensive and unique to Luci Digital. Currently, Luci Digital is the only entity within the WestWorld ecosystem with the certifications necessary to deliver advanced Apple services. This positions WestWorld as a trusted support provider and builds credibility within the tech community.

12. Pathways for Market Expansion and Holistic Technology Support

Luci Digital brings a unique opportunity for WestWorld to expand beyond its traditional Apple-centric market by diversifying into **holistic tech support** for a range of devices and brands. With Luci Digital as a collaborative partner, WestWorld can enhance its service offerings, reaching clients who rely on **multi-brand ecosystems** and prefer integrated tech support solutions.

- **Breaking Beyond Apple-Centric Boundaries:**

While WestWorld has established itself as Edmonton's original Apple store, Luci Digital's independence allows it to support a wider array of devices and operating systems. This approach provides flexibility to meet **client needs in holistic tech support**—from PCs to Android devices—enabling growth in markets that demand cross-platform expertise.

- **Building on WestWorld's Legacy with New Client Demographics:**

Luci Digital's role enables WestWorld to cater to clients who might not see Apple as their primary tech brand, bringing **new demographics** and **business opportunities** into the fold. By adding Luci Digital's expertise, WestWorld can reach businesses and individuals who need comprehensive tech support but have been underserved in the Apple-only market.

- **Unified Brand, Broader Reach:**

Together, Luci Digital and WestWorld can offer a wider scope of technology solutions under a collaborative strategy. This positions WestWorld as a more versatile tech hub, all while maintaining Luci Digital's ability to operate independently, which reduces the friction that often comes from single-brand loyalty.

13. Future-Focused Resource Flexibility

Looking ahead, Luci Digital is committed to maintaining an agile operational structure that aligns with WestWorld's goals. By utilizing shared resources as appropriate, we enable WestWorld the **freedom to adapt** and **craft its future** without taking on additional overhead. This approach ensures that our partnership remains flexible and beneficial as both companies grow.

14. Walmart Canada Marketplace Partnership

As part of our collaborative strategy, Luci Digital proposes taking on the **Walmart Canada marketplace partnership** currently under WestWorld. This platform holds considerable potential for reaching a broader customer base and expanding the service offerings available to clients across Canada. By allowing Luci Digital to manage this channel, we can ensure that it receives focused attention and strategic growth, maximizing its value as an asset within the overall business structure.

Summary and Next Steps

Please review this proposal, and let me know if there are any adjustments. I'm confident this structure supports WestWorld's growth goals while creating an efficient, transparent partnership. We can discuss launching the scheduling portal and finalizing the retainer once you're comfortable with the details.

Looking forward to moving forward together.

Best regards,

Daryl & Lucia
